XIS-Van

Heavy Duty Vehicle Mobile Screening Solution

TRANSPORTATION

Airport entrances and perimeters,
air cargo, and checkpoint technology.

PORTS & BORDERS

Border control, sea ports, and
other large cargo sectors.

CRITICAL INFRASTRUCTURE

Access control for prisons, courthouses,
mailrooms, hotel entrances and
military bases.

With a tunnel opening of 101.6 cm x 101.3 cm (400 x 400"), the XIS-Van is capable of screening parcels, baggage and freight for explosives and contraband. The XIS-Van offers optional 4 Wheel Drive and is built for use on both urban and rugged terrain.

The XIS-Van enables operators to screen images within the safety of the operator cabin, while standard Air Conditioning provides a comfortable and efficient working environment.

The XIS-Van is ideally suited for outside events, border checkpoints, and various mobile screening needs. The XIS-Van features a high performance vehicle, extraordinary standard features, and a state-of-the-art XIS System.

All Astrophysics X-ray Inspection Systems are equipped with Real-Time Diagnostics, a unique Astrophysics feature which allows users to monitor system health. This software was specifically engineered to save you valuable time and money. If requested, Astrophysics would also be able to connect to your system and troubleshoot any issues remotely.

An exclusive Astrophysics option is our 6 Color Imaging, which enables operators to view screened objects in 6 colors, each color correlating to a specific range of Atomic Z-Numbers. 6 Color Imaging enables operators to achieve optimal material identification which improves throughputs.

Astrophysics is committed to providing quality products and services nationwide. We listen to our customers and offer customizations and order flexibility based on their needs.

Backed by a team of engineers from our City of Industry, California center of excellence headquarters, Astrophysics designs cutting-edge X-ray screening technology for detecting weapons and contraband for transportation, ports, borders, critical infrastructure and other industries that present security risks.

Astrophysics is headquartered in the United States and maintains a global presence with service delivery worldwide. Astrophysics is committed to global safety and is proud to present this new age of screening security—driving the industry into the technology of tomorrow.
