XIS-6040M

High Mobility Screening

Checkpoint Security: Small Baggage and Parcel Inspection

TRANSPORTATION

Airport entrances and perimeters,
air cargo, and checkpoint technology.

PORTS & BORDERS

Border control, sea ports, and
other large cargo sectors.

CRITICAL INFRASTRUCTURE

Access control for prisons, courthouses,
mailrooms, hotel entrances and
military bases.

The XIS-6040M (Mobile) is an X-Ray Inspection System with tunnel dimensions of 60.0 cm x 40.0 cm (23.6" x 15.7"). The XIS-6040M is specifically designed for easy relocation at prisons, ships, banks, courthouses, government facilities and other high security checkpoints where rapid deployment and quick system operation is essential.

The XIS-6040M features larger heavy duty wheels, stainless steel handle bars and a lockable operator control panel which folds seamlessly into the system when not in use.

The XIS-6040M is equipped with a powerful 160kV generator and a design that enables fast maneuvering for an immediate screening solution.

All Astrophysics X-ray Inspection Systems are equipped with Real-Time Diagnostics, a unique Astrophysics feature which allows users to monitor system health. This software was specifically engineered to save you valuable time and money. If requested, Astrophysics would also be able to connect to your system and troubleshoot any issues remotely.

An exclusive Astrophysics option is our 6 Color Imaging, which enables operators to view screened objects in 6 colors, each color correlating to a specific range of Atomic Z-Numbers. 6 Color Imaging enables operators to achieve optimal material identification which improves throughputs.

Astrophysics is committed to providing quality products and services nationwide. We listen to our customers and offer customizations and order flexibility based on their needs.

Backed by a team of engineers from our City of Industry, California center of excellence headquarters, Astrophysics designs cutting-edge X-ray screening technology for detecting weapons and contraband for transportation, ports, borders, critical infrastructure and other industries that present security risks.

Astrophysics is headquartered in the United States and maintains a global presence with service delivery worldwide. Astrophysics is committed to global safety and is proud to present this new age of screening security—driving the industry into the technology of tomorrow.
